The Adaptable Mind John Zerilli 2020-12-15 "What conception of mental architecture can survive the evidence of neuroplasticity and neural reuse in the

human brain? In particular, what sorts of modules are compatible with this evidence? This book shows how developmental and adult neuroplasticity, as well as evidence of pervasive neural reuse, forces a revision to the standard conceptions of modularity and spells the end of a hardwired and dedicated language module. It argues from principles of both neural reuse and neural redundancy that language is facilitated by a composite of modules (or module-like entities), few if any of which are likely to be linguistically special, and that neuroplasticity provides evidence that (in key respects and to an appreciable extent) few if any of them ought to be considered developmentally robust, though their development does seem to be constrained by features intrinsic to particular regions of cortex (manifesting as domain-specific predispositions or acquisition biases). In the course of doing so, the book articulates a schematically and neurobiologically precise framework for understanding modules and their supramodular interactions"--

Public Health Nursing Marcia Stanhope 2015-10-07 Prepare for a successful career as a community/public health nurse! Public Health Nursing: Population-Centered Health Care in the Community, 9th Edition provides up-to-date information on issues that impact public health nursing, such as infectious diseases, natural and man-made disasters, and health care policies affecting individuals, families, and communities. Real-life scenarios show examples of health promotion and public health interventions. New to this edition is an emphasis on QSEN skills and an explanation of the influence of the Affordable Care Act on public health. Written by well-known nursing educators Marcia Stanhope and Jeanette Lancaster, this comprehensive, bestselling text is ideal for students in both BSN and Advanced Practice Nursing programs. Evidence-Based Practice and Cutting Edge boxes illustrate the use and application of the latest research findings in public/community health nursing. Healthy People 2020 boxes highlight goals and objectives for promoting the nation's health and wellness over the next decade. Levels of Prevention boxes identify specific nursing interventions at the primary, secondary, and tertiary levels. Practice Application scenarios help you apply chapter content to the practice setting by analyzing case situations and answering critical thinking questions. Linking Content to Practice boxes provide examples of the nurse's role in caring for individuals, families, and populations in community health settings. Unique! Separate chapters on healthy cities, the Minnesota Intervention Wheel, and nursing centers describe different approaches to community health initiatives. Community/Public Health Nursing Online consists of 14 modules that bring community health situations to life, each including a reading assignment, case scenarios with learning activities, an assessment quiz, and critical thinking questions. Sold separately. NEW! Coverage of health care reform discusses the impact of The Patient Protection and Affordable Care Act of 2010 (ACA) on public health nursing. NEW! Focus on Quality and Safety Education for Nurses boxes give examples of how quality and safety goals, knowledge, competencies and skills, and attitudes can be applied to nursing practice in the community.

What Do You Know About Evolution and Classification? Anna Claybourne 2017-12-15 Earth is home to billions of life-forms, and scientists discover new species all the time. How do we keep track of all these living things? This immersive book gives readers a firsthand look at evolution and classification. They'll learn about the scientific method through Ask, Test, Observe, and Measure boxes that guide them through each experiment. "What's Next?" sections encourage readers to continue exploring each essential concept. As they complete each project, they'll develop Next Generation Science Standards skills, such as how to ask testable questions. Accessible, fun, and full of amazing photographs, this engaging look at evolution and classification will be an important tool in any science curriculum.

The Right Environment 6-Pack Debra Housel 2015-05-20 Home sweet home. Organisms must live in the right habitat to survive. And when their needs are met, the right environment enables plants and animals to thrive. From the desert to the tundra, learn about food webs, animal niches, climates, and other features of various biomes and their ecosystems in this life science book. This 6-Pack provides five days of standards-based activities that support STEM

education and build content-area literacy in life science. It includes vibrant images, fun facts, helpful diagrams, and text features such as a glossary and index. The hands-on Think Like a Scientist lab activity aligns with Next Generation Science Standards (NGSS). The accompanying 5E lesson plan incorporates writing to increase overall comprehension and concept development and features: Step-by-step instructions with before-, during-, and after-reading strategies; Introductory activities to develop academic vocabulary; Learning objectives, materials lists, and answer key; Science safety contract for students and parents Why Asking Donors For Money Causes Donors To Give Less Lindsay Walton 2018-10-03 Treating your donors as members of a community rather than as individual units MATTERS! Human beings have limited interest in supporting others by giving money. However, they have an intense interest in supporting others through sharing resources. In fact, there are 6 Key Resource Categories that you can count on donors giving from if you ask. What category they choose to give from will simply depend on who you are and what you are asking for at the time! Traditional fundraising tools and practices focus on leveraging donor PSYCHOLOGY, the inner workings of an individual's mind, and as a result consistently only gain access to 17% of what a donor community is interested in giving. Understanding the power of donor SOCIOLOGY, the dynamic workings of people's minds when they live in community with others changes everything! Knowing more about these principles can help you gather more resources than you ever thought possible!

Listening to People Annette Lareau 2021-10-08 A down-to-earth, practical guide for interview and participant observation and analysis. In-depth interviews and close observation are essential to the work of social scientists, but inserting one's researcher-self into the lives of others can be daunting, especially early on. Esteemed sociologist Annette Lareau is here to help. Lareau's clear, insightful, and personal guide is not your average methods text. It promises to reduce researcher anxiety while illuminating the best methods for first-rate research practice. As the title of this book suggests, Lareau considers listening to be the core element of interviewing and observation. A researcher must listen to people as she collects data, listen to feedback as she describes what she is learning, listen to the findings of others as they delve into the existing literature on topics, and listen to herself in order to sift and prioritize some aspects of the study over others. By listening in these different ways, researchers will discover connections, reconsider assumptions, catch mistakes, develop and assess new ideas, weigh priorities, ponder new directions, and undertake numerous adjustments—all of which will make their contributions clearer and more valuable. Accessibly written and full of practical, easy-to-follow guidance, this book will help both novice and experienced researchers to do their very best work. Qualitative research is an inherently uncertain project, but with Lareau's help, you can alleviate anxiety and focus on success.

Group Decision and Negotiation: Methodological and Practical Issues Danielle Costa Morais 2022-05-24 This book constitutes the refereed proceedings of the 22nd International Conference on Group Decision and Negotiation, GDN 2022, which was held virtually during June 12–16, 2022. The field of Group Decision and Negotiation focuses on decision processes with at least two participants and a common goal but conflicting individual goals. Research areas of Group Decision and Negotiation include electronic negotiations, experiments, the role of emotions in group decision and negotiations, preference elicitation and decision support for group decisions and negotiations, and conflict resolution principles. This year's conference focusses on methodological and practical issues. The 9 full papers presented in this volume were carefully reviewed and selected from 68 submissions. They were organized in the following topical sections: Preference modeling for group decision and negotiation; conflict resolution; collaborative decision making processes.

Principles of Social Psychology Kelly G. Shaver 2015-06-19 Originally published in 1987 this third edition won praise from students and instructors alike for its challenging "no nonsense" approach to the field. Thoroughly updated to reflect current research of the time, the text retains the qualities that had become its hallmarks: a cognitive approach to the process of socialization, and an emphasis on the ideas that give the discipline continuity. It offers clear, conceptually integrated discussions of all of the major topics in social psychology from the time. Shaver's focus on the concepts of social psychology provides a framework for students to develop their own applications. The principles of social behavior are presented in the text in the same way they develop in the individual moving from internal processes (social perception, self-recognition) to external issues (the environment, the law) that influence behavior. Shaver weaves contemporary issues into his treatment of basic theories, using examples from everyday situations. His supple writing engages students in the complexity of

social behavior, and is one reason this title remained one of the most highly regarded texts in the field at the time.

Practitioner's Guide to Using Research for Evidence-Informed Practice Allen Rubin 2022-03-08 The latest edition of an essential text to help students and practitioners distinguish between research studies that should and should not influence practice decisions Now in its third edition, Practitioner's Guide to Using Research for Evidence-Informed Practice delivers an essential and practical guide to integrating research appraisal into evidence-informed practice. The book walks you through the skills, knowledge, and strategies you can use to identify significant strengths and limitations in research. The ability to appraise the veracity and validity of research will improve your service provision and practice decisions. By teaching you to be a critical consumer of modern research, this book helps you avoid treatments based on fatally flawed research and methodologies. Practitioner's Guide to Using Research for Evidence-Informed Practice, Third Edition offers: An extensive introduction to evidence-informed practice, including explorations of unethical research and discussions of social justice in the context of evidence-informed practice. Explanations of how to appraise studies on intervention efficacy, including the criteria for inferring effectiveness and critically examining experiments. Discussions of how to critically appraise studies for alternative evidence-informed practice questions, including nonexperimental quantitative studies and qualitative studies. A comprehensive and authoritative blueprint for critically assessing research studies, interventions, programs, policies, and assessment tools, Practitioner's Guide to Using Research for Evidence-Informed Practice belongs in the bookshelves of students and practitioners of the social sciences.

A Sourcebook for Mental Health Measures, Incorporating the Final Report on "A Taxonomy of Data-collecting Devices" Andrew Laurence Comrey 1973 This work was created to help researchers in the mental health field to access mental health measures that were previously mainly inaccessible, and to help reduce the costs of duplicative efforts to create mental health measures that had already been created.

Criminal Justice and Criminology Research Methods Peter B. Kraska 2020-12-31 Criminal Justice and Criminology Research Methods, Third Edition, is an accessible and engaging text that offers balanced coverage of a full range of contemporary research methods. Filled with gritty criminal justice and criminology examples including policing, corrections, evaluation research, forensics, feminist studies, juvenile justice, crime theory, and criminal justice theory, this new edition demonstrates how research is relevant to the field and what tools are needed to actually conduct that research. Kraska, Brent, and Neuman write in a pedagogically friendly style yet without sacrificing rigor, offering balanced coverage of qualitative, quantitative, and mixed methods. With its exploration of the thinking behind science and its cutting-edge content, the text goes beyond the nuts and bolts to teach students how to competently critique as well as create research-based knowledge. This book is suitable for undergraduate and early graduate students in US and global Criminology, Criminal Justice, and Justice Studies programs, as well as for senior scholars concerned with incorporating the latest mixed-methods approaches into their research.

Situated Literacies David Barton 2005-08-04 Situated Literacies is a rich and varied collection of key writings from leading international scholars in the field of literacy. Each contribution, written in a clear, accessible style, makes the link between literacies in specific contexts and broader social practices. Detailed

ethnographic studies of a wide variety of specific situations, all involving real texts and lived practices, are balanced with general claims about the nature of literacy. Contributors address a coherent set of issues: * the visual and material aspects of literacy * concepts of time and space in relation to literacy * the functions of literacies in shaping and sustaining identities in communities of practice * the relationship between texts and the practices associated with their use the role of discourse analysis on literacy studies These studies, along with a foreword by Denny Taylor, make a timely and important contribution to literacy theory and suggest directions for the further development of the field. Situated Literacies is essential reading for anyone involved in literary education. Developments in Current Game-Based Learning Design and Deployment Felicia, Patrick 2012-07-31 Educational gaming is becoming more popular at universities, in the military, and in private business. Multidisciplinary research which explores the cognitive and psychological aspects that underpin successful educational video games is therefore necessary to ensure proper curriculum design and positive learning outcomes. Developments in Current Game-Based Learning Design and Deployment highlights the latest research from professionals and researchers working in the fields of educational games development, e-learning, multimedia, educational psychology, and information technology. It promotes an in-depth understanding of the multiple factors and challenges inherent to the design and integration of game-based Learning environments.

Principles of Neural Coding Rodrigo Quiroga 2013-05-06 Understanding how populations of neurons encode information is the challenge faced by researchers in the field of neural coding. Focusing on the many mysteries and marvels of the mind has prompted a prominent team of experts in the field to put their heads together and fire up a book on the subject. Simply titled Principles of Neural Coding, this book covers the complexities of this discipline. It centers on some of the major developments in this area and presents a complete assessment of how neurons in the brain encode information. The book collaborators contribute various chapters that describe results in different systems (visual, auditory, somatosensory perception, etc.) and different species (monkeys, rats, humans, etc). Concentrating on the recording and analysis of the firing of single and multiple neurons, and the analysis and recording of other integrative measures of network activity and network states—such as local field potentials or current source densities—is the basis of the introductory chapters. Provides a comprehensive and interdisciplinary approach Describes topics of interest to a wide range of researchers The book then moves forward with the description of the principles of neural coding for different functions and in different species and concludes with theoretical and modeling works describing how information processing functions are implemented. The text not only contains the most important experimental findings, but gives an overview of the main methodological aspects for studying neural coding. In addition, the book describes alternative approaches based on simulations with neural networks and in silico modeling in this highly interdisciplinary topic. It can serve as an important reference to students and professionals.
